INDEX

Accessory factors for plant growth (Rosenheim) 7
Accessory, growth promoting, in yeast (Drummond) 255
Accessory, water-soluble, in yeast (Drummond) 255
Acid production of *B. perfringens* and *B. sporogenes* (Wolf and Telfer) 197
Acids, effect of, on growth of *B. perfringens* and *B. sporogenes* (Wolf and Harris) 213
Activation of washed zymin, conditions of (Harden) 64
Adsorptive stratification in gels (Bradford) 14
Albumin, heat denaturation of, influence of, on proteins of concentrated antitoxic sera (Homer) 292
Alcoholic fermentation, question of lactic acid as an intermediate product of (Lebedev) 189
Alcoholic fermentation, specific action of certain cations in (Harden) 64
Amino-acids, bacterial production of colour changes upon (Cornish and Williams) 180
Amino-acids, oxidation of, with chloramine-T (Dakin) 79
Anaerobes, pathogenic, contributions to biochemistry of (Wolf and Telfer) 197; (Wolf and Harris) 213
ANNETT, H. E. Occurrence of raffinose in the seed of the jute plant (*Corchorus capsularis*) 1
Antineuritic properties, alleged, of α-hydroxypyridine (Harden and Zilva) 172
Antitoxic sera, concentrated, influence of heat denaturation of pseudoglobulin and albumin on the nature of the proteins of (Homer) 292
Antitoxic sera, concentration of, by the Banzhaf (1913) process, influence of phenol and cresylic acid on the (Homer) 277
Antitoxic sera, reaction of, in relation to concentration processes (Homer) 21
Arginine carbonate, administration of, to bird in conjunction with paraformaldehyde and hexamethylenetetramine (Thompson) 307
ARRHENIUS, S. The viscosity of solutions 112

Bacillus perfringens, acid production of (Wolf and Telfer) 197
Bacillus perfringens, effect of acids on growth of (Wolf and Harris) 213
Bacillus sporogenes, acid production of (Wolf and Telfer) 197
Bacillus sporogenes, effect of acids on growth of (Wolf and Harris) 213
Bacillus Welchii see *B. perfringens*
Bacteria, coli-typhosus group of, conversion of histidine into urocanic acid by (Raistrick) 71
Bacteria, colour changes produced by, upon caseinogen and amino-acids (Cornish and Williams) 180
Banzhaf (1913) process of concentration of antitoxic sera, influence of phenol and cresylic acid on (Homer) 277
BARGER, G. and EWINS, A. J. The synthesis of *Pr*-2-methyltryptophan 58
Beer, distribution of nitrogen in (Sharpe) 101
Bird, creatine excretion in, produced by paraformaldehyde and hexamethylenetetramine (Thompson) 307
BRADFORD, S. C. Adsorptive stratification in gels, II 14
BROWN, W. Further contributions to the technique of preparing membranes for dialysis 40
Butyrates, alkali, oxidation of by hydrogen peroxide (Cahen and Hurtley) 164

CAHEN, E. and HURTLEY, W. H. The oxidation of the alkali butyrates by hydrogen peroxide with the production of succinic acid 164
Caseinogen, bacterial production of colour changes upon (Cornish and Williams) 180
Cations, specific action of certain, in alcoholic fermentation (Harden) 64
Chloramine-T, oxidation of amino-acids with (Dakin) 79
CLARKE, G. and SCHRYVER, S. B. The preparation of plant nucleic acids 319
Colorimetric determination of hydrogen ion concentration by the use of indicators (Homer) 283
Colour changes produced by bacteria upon caseinogen and amino-acids (Cornish and Williams) 180
Concentration of antitoxic sera, reaction in relation to (Homer) 21
Corchorus capsularis, occurrence of raffinose in seed of (Annett) 1
CORNISH, E. C. V. and WILLIAMS, R. S. Changes produced by two groups of bacteria upon caseinogen and certain amino-acids 180
Cow, milk fat of, distribution of fatty acids in the (Crowther and Hynd) 139
Creatine, excretion of, in bird produced by paraformaldehyde and hexamethylenetetramine (Thompson) 307
Creatine, formation of (Thompson) 307
Cresylic acid, influence of, on concentration of antitoxic sera by the Banzhaf (1913) process (Homer) 277

INDEX

Accessory factors for plant growth (Rosenheim) 7
Accessory, growth promoting, in yeast (Drummond) 255
Accessory, water-soluble, in yeast (Drummond) 255
Acid production of *B. perfringens* and *B. sporogenes* (Wolf and Telfer) 197
Acids, effect of, on growth of *B. perfringens* and *B. sporogenes* (Wolf and Harris) 213
Activation of washed zymin, conditions of (Harden) 64
Adsorptive stratification in gels (Bradford) 14
Albumin, heat denaturation of, influence of, on proteins of concentrated antitoxic sera (Homer) 292
Alcoholic fermentation, question of lactic acid as an intermediate product of (Lebedev) 189
Alcoholic fermentation, specific action of certain cations in (Harden) 64
Amino-acids, bacterial production of colour changes upon (Cornish and Williams) 180
Amino-acids, oxidation of, with chloramine-T (Dakin) 79
Anaerobes, pathogenic, contributions to biochemistry of (Wolf and Telfer) 197; (Wolf and Harris) 213
ANNETT, H. E. Occurrence of raffinose in the seed of the jute plant (*Corchorus capsularis*) 1
Antineuritic properties, alleged, of α-hydroxypyridine (Harden and Zilva) 172
Antitoxic sera, concentrated, influence of heat denaturation of pseudoglobulin and albumin on the nature of the proteins of (Homer) 292
Antitoxic sera, concentration of, by the Banzhaf (1913) process, influence of phenol and cresylic acid on the (Homer) 277
Antitoxic sera, reaction of, in relation to concentration processes (Homer) 21
Arginine carbonate, administration of, to bird in conjunction with paraformaldehyde and hexamethylenetetramine (Thompson) 307
ARRHENIUS, S. The viscosity of solutions 112

Bacillus perfringens, acid production of (Wolf and Telfer) 197
Bacillus perfringens, effect of acids on growth of (Wolf and Harris) 213
Bacillus sporogenes, acid production of (Wolf and Telfer) 197
Bacillus sporogenes, effect of acids on growth of (Wolf and Harris) 213
Bacillus Welchii see *B. perfringens*
Bacteria, coli-typhosus group of, conversion of histidine into urocanic acid by (Raistrick) 71
Bacteria, colour changes produced by, upon caseinogen and amino-acids (Cornish and Williams) 180
Banzhaf (1913) process of concentration of antitoxic sera, influence of phenol and cresylic acid on (Homer) 277
BARGER, G. and EWINS, A. J. The synthesis of *Pr*-2-methyltryptophan 58
Beer, distribution of nitrogen in (Sharpe) 101
Bird, creatine excretion in, produced by paraformaldehyde and hexamethylenetetramine (Thompson) 307
BRADFORD, S. C. Adsorptive stratification in gels, II 14
BROWN, W. Further contributions to the technique of preparing membranes for dialysis 40
Butyrates, alkali, oxidation of by hydrogen peroxide (Cahen and Hurtley) 164

CAHEN, E. and HURTLEY, W. H. The oxidation of the alkali butyrates by hydrogen peroxide with the production of succinic acid 164
Caseinogen, bacterial production of colour changes upon (Cornish and Williams) 180
Cations, specific action of certain, in alcoholic fermentation (Harden) 64
Chloramine-T, oxidation of amino-acids with (Dakin) 79
CLARKE, G. and SCHRYVER, S. B. The preparation of plant nucleic acids 319
Colorimetric determination of hydrogen ion concentration by the use of indicators (Homer) 283
Colour changes produced by bacteria upon caseinogen and amino-acids (Cornish and Williams) 180
Concentration of antitoxic sera, reaction in relation to (Homer) 21
Corchorus capsularis, occurrence of raffinose in seed of (Annett) 1
CORNISH, E. C. V. and WILLIAMS, R. S. Changes produced by two groups of bacteria upon caseinogen and certain amino-acids 180
Cow, milk fat of, distribution of fatty acids in the (Crowther and Hynd) 139
Creatine, excretion of, in bird produced by paraformaldehyde and hexamethylenetetramine (Thompson) 307
Creatine, formation of (Thompson) 307
Cresylic acid, influence of, on concentration of antitoxic sera by the Banzhaf (1913) process (Homer) 277

CROWTHER, C. and HYND, A. The distribution of fatty acids in the milk fat of the cow and sheep 139

DAKIN, H. D. On the oxidation of amino-acids and of related substances with chloramine-T 79
Denaturation by heat of pseudoglobulin and albumin, influence of, on nature of proteins in concentrated antitoxic sera (Homer) 292
Desoxycholic acid, preparation of (Mair) 11
Dialysis, membranes for, technique of preparation of (Brown) 40
DRUMMOND, J. C. A comparative study of tumour and normal tissue growth 325
DRUMMOND, J. C. A study of the water-soluble accessory growth promoting substance in yeast, I 255
DRUMMOND, J. C. The nitrogenous extractives of tumours 246

EWINS, A. J. *see* BARGER, G.
Extractives, nitrogenous, of tumours (Drummond) 246

Faeces, fatty acids and soaps in, estimation of (Sharpe) 96
Fat, milk, cow and sheep, distribution of fatty acids in the (Crowther and Hynd) 139
Fatty acids, higher, estimation of, in faeces (Sharpe) 96
Fatty acids, milk fat of the cow and sheep, distribution of, in the (Crowther and Hynd) 139
Fermentation, alcoholic, question of lactic acid as an intermediate product of (Lebedev) 189
Fermentation, alcoholic, specific action of certain cations in (Harden) 64
Formaldehyde, methylation of amino-compounds by (Werner) 318

Gels, adsorptive stratification in (Bradford) 14
GREY, E. C. The estimation of succinic acid 134
Growth of *B. perfringens* and *B. sporogenes*, effect of acids on (Wolf and Harris) 213
Growth, of tumour and normal tissue, a comparative study of (Drummond) 325
Growth, plant, accessory factors for (Rosenheim) 7

HARDEN, A. The conditions of activation of washed zymin and the specific function of certain cations in alcoholic fermentation 64
HARDEN, A. and ZILVA, S. S. The alleged antineuritic properties of α-hydroxypyridine 172
HARRIS, J. E. G. *see* WOLF, C. G. L.
Hexamethylenetetramine, creatine excretion in bird produced by (Thompson) 307
Histidine, bacterial conversion of, into urocanic acid (Raistrick) 71
HOMER, A. A note on the use of indicators for the colorimetric determination of the hydrogen ion concentration of sera 283
HOMER, A. Further observations on the influence of phenol and of cresylic acid on the concentration of antitoxic sera by the Banzhaf (1913) process 277
HOMER, A. On the influence of the heat denaturation of pseudoglobulin and albumin on the nature of the proteins appearing in concentrated antitoxic sera 292
HOMER, A. The reaction of sera as a factor in the successful concentration of antitoxic sera by the methods at present in use 21
HURTLEY, W. H. *see* CAHEN, C.
Hydrogen ion concentration, colorimetric determination of, in sera by means of indicators (Homer) 283
Hydrogen ion concentration, in relation to concentration of antitoxic sera (Homer) 21
Hydrogen peroxide, products of oxidation of alkali butyrates by (Cahen and Hurtley) 164
α-Hydroxypyridine, antineuritic properties of, the alleged (Harden and Zilva) 172
HYND, A. *see* CROWTHER, C.

Indicators, colorimetric determination of hydrogen ion concentration in sera by the use of (Homer) 283

Jute plant, occurrence of raffinose in seed of (Annett) 1

Lactic acid, question of, as an intermediate product of alcoholic fermentation (Lebedev) 189
LEBEDEV, A. L'acide lactique est-il un produit intermediaire de la fermentation alcoolique? 189

MAIR, W. The preparation of desoxycholic acid 11
Membranes for dialysis, technique of preparation of (Brown) 40
Methylation of amino-compounds by formaldehyde (Werner) 318
Pr-2-Methyltryptophan, synthesis of (Barger and Ewins) 58
Milk fat, cow and sheep, distribution of fatty acids in the (Crowther and Hynd) 139

Nitrogen, distribution of, in beer (Sharpe) 101
Nitrogenous extractives of tumours (Drummond) 246
Nucleic acids, plant, preparation of (Clarke and Schryver) 319

Oxidation of alkali butyrates by hydrogen peroxide (Cahen and Hurtley) 164
Oxidation of amino-acids with chloramine-T (Dakin) 79

Paraformaldehyde, creatine excretion in bird produced by (Thompson) 307

Phenol, influence of, on concentration of antitoxic sera by the Banzhaf (1913) process (Homer) 277
Phenylethylamine, reduction of (Weinhagen) 273
Plant growth, accessory factors for (Rosenheim) 7
Plant nucleic acids, preparation of (Clarke and Schryver) 319
Proteins, of concentrated antitoxic sera, influence of heat denaturation of pseudoglobulin and albumin on nature of (Homer) 292
Pseudoglobulin, heat denaturation of, influence of, on proteins of concentrated antitoxic sera (Homer) 292

Raffinose, occurrence of, in seed of jute plant (Annett) 1
RAISTRICK, H. On a new type of chemical change produced by bacteria. The conversion of histidine into urocanic acid by bacteria of the coli-typhosus group 71
Reaction in relation to concentration of antitoxic sera (Homer) 21
Reduction of phenylethylamine (Weinhagen) 273
ROSENHEIM, O. Accessory factors for plant growth 7

SCHRYVER, S. B. *see* CLARKE, G.
Sera, antitoxic, concentrated, influence of heat denaturation of pseudoglobulin and albumin on the nature of the proteins of (Homer) 292
Sera, antitoxic, influence of phenol and cresylic acid on the concentration of, by the Banzhaf (1913) process (Homer) 277
Sera, antitoxic, reaction of, in relation to concentration processes (Homer) 21
SHARPE, J. S. A rapid process for the estimation of the higher fatty acids and soap in faeces 96
SHARPE, J. S. The distribution of nitrogen in beer 101
Sheep, milk fat of, distribution of fatty acids in the (Crowther and Hynd) 139
Soaps, estimation of, in faeces (Sharpe) 96
Solutions, viscosity of (Arrhenius) 112
Stratification, adsorptive, in gels (Bradford) 14
Succinic acid, estimation of (Grey) 134
Succinic acid, production of, from alkali butyrates by oxidation (Cahen and Hurtley) 164

TELFER, S. V. *see* WOLF, C. G. L.
THOMPSON, W. H. The formation of creatine. Effects on the excretion of creatine in the bird produced by paraformaldehyde and hexamethylenetetramine given separately and combined with arginine carbonate and other substances. (With an addendum by E. A. WERNER) 307
Tissue, normal, growth of, a comparative study of (Drummond) 325
Tumour growth, a comparative study of (Drummond) 325
Tumours, nitrogenous extractives of (Drummond) 246

Urocanic acid, bacterial formation of, from histidine (Raistrick) 71

Viscosity of solutions (Arrhenius) 112

Water-soluble accessory in yeast (Drummond) 255
WEINHAGEN, A. The reduction of phenylethylamine 273
WERNER, E. A. Addendum to paper by W. H. Thompson 318
WILLIAMS, R. S. *see* CORNISH, E. C. V.
WOLF, C. G. L. and HARRIS, J. E. G. Contributions to the biochemistry of pathogenic anaerobes, III. The effect of acids on the growth of *Bacillus Welchii* (*B. perfringens*) and *Bacillus sporogenes* (Metchnikoff) 213
WOLF, C. G. L. and TELFER, S. V. Contributions to the biochemistry of pathogenic anaerobes, II. The acid production of *Bacillus Welchii* (*B. perfringens*) and *Bacillus sporogenes* (Metchnikoff) 197

Yeast, water-soluble, growth promoting accessory in (Drummond) 255

ZILVA, S. S. *see* HARDEN, A.
Zymin, washed, conditions of activation of (Harden) 64

CAMBRIDGE: PRINTED BY J. B. PEACE, M.A., AT THE UNIVERSITY PRESS.
